 Teacher name	Chris Zachary
 Link to course	www.skillshare.com/en/classes/intro-to-adobe-after-effects-motion-design-for-beginners/474209703
 Content tags	Motion / Animation
 Sub-content tags	After Effects Best Practices Software
 Duration	01h17m
 Status	Started - Ongoing
 Starting date	September 13, 2026
 Finishing date	September 16, 2026
 Star rating	★★★★★
 Draft	No

- Navigation and Panels
- Compositions
- Shape Layers
- Layers
- Keyframes

- Basic keyboard shortcuts
- 'Work area'
- Easing
- Graph Editor: The God Of Smooth, Professional Animation
 - Views: Speed graph; Value graph
 - right click > Keyframe Assistant > Easy Ease

Animation curves are the #1 thing that separate great animators from beginners!

**** linear keyframes → "hourglass keyframes"**

- **Pro Tip:**
 - A technique that is used very often to trick the eyes, it's to make changes (to an object, for instance) when the movement is at it's fastest
- 'Keyframe Interpolation' 🔍
- Precompositions
- Masking
- Null Object
 - Layered Motion!
- Parent linking
- **Compositing:** lighting, blending, effects, etc. Cool Stuff

**** used to achieve a desired look/style and feel**
- Layer Styles
- Adjustment Layers
- Effects & Effects Control Panel

"Animation is all about the *feel*"
